SPECIALISTS FOR THE CHEMICAL INDUSTRY

RLE ENGINEERING &
SERVICES

Strong teams for strong partners.

We can connect you with the right specialists for the chemical industry.

For almost 40 years, RLE Engineering & Services has been offering comprehensive recruitment and personnel placement services and placing highly qualified specialists with renowned employers.

We are part of the globally active RLE INTERNATIONAL Group, one of the leading development and consulting service providers for the mobility industry - with locations in Europe, North America and Asia. We successfully transfer our many years of experience in engineering and in technology-driven industries to the chemical industry with its specific requirements for safety, quality and technical know-how.

We support companies in the chemical and process industry in filling key technical, scientific and administrative positions and actively contribute to securing and sustainably strengthening their personnel structure.

In this area, we are primarily able to fill the following positions:

- Chemical laboratory technicians
- Chemical technicians
- Process engineers
- Project engineers (m/f/d)
- Occupational safety specialists (m/f/d)
- Regulatory affairs managers
- Quality assurance specialists (m/f/d)
- Maintenance and service technicians
- Production planners and plant managers
- Technical assistants and administrative staff (m/f/d)

Advantages for your company:

- Access to qualified specialists and managers with industry experience
- Customized recruitment for positions in the laboratory, production, technology & administration
- Relief for your internal HR and recruiting departments
- Flexibility for project peaks or long-term personnel requirements
- High quality & security in the selection process thanks to industry-specific expertise
