RLE ENGINEERING &
SERVICES

Strong teams for strong partners.

With us you will find suitable specialists for your defense technology

For almost 40 years, RLE Engineering & Services has been providing comprehensive recruitment and staffing services and placing highly qualified professionals with renowned employers.

We are part of the global RLE INTERNATIONAL Group, a leading engineering and consulting services provider to the mobility industry with offices in Europe, North America and Asia. Our many years of experience in engineering and in technology-driven industries enable us to respond specifically to the requirements of safety-critical areas such as defense technology.

In addition to our core expertise in the automotive and mechanical engineering industries, we have specialized specifically in defence technology. In this highly regulated and security-relevant sector, reliability, discretion and technical excellence are essential.

We support defense and security technology companies in filling key positions - with a deep understanding of the industry-specific requirements, certifications and security specifications.

In this area, we are particularly able to fill the following positions:

- System engineers (m/f/d)
- Design engineers and CAD specialists (m/f/d)
- Project managers for defense technology (m/f/d)
- Quality assurance & documentation specialists (m/f/d)
- Software developers for safety-critical systems (m/f/d)
- Electrical and mechatronic engineers (m/f/d)
- Experts for approval / standards / specifications (m/f/d)
- Technical writers / configuration managers (m/f/d)
- Specialists with safety checks (SÜ2/SÜ3) (m/f/d)

Advantages for your company:

- Access to qualified specialists with industry experience and security clearance
- Relief for internal recruiting and HR structures
- Custom-fit staffing, even in highly specialized projects
- Support for project peaks and long-term capacity building
- Confidentiality and compliance at the highest level
