RLE ENGINEERING &
SERVICES

Strong teams for strong partners.

With us you will find suitable specialists for medical technology

For almost 40 years, RLE Engineering & Services has been offering comprehensive recruitment and personnel placement services and placing highly qualified specialists with renowned employers.

We are part of the globally active RLE INTERNATIONAL Group, which is one of the leading development and consulting service providers for the mobility industry - with locations in Europe, North America and Asia. Our many years of experience in technical and organizational projects enable us to place specialists in various industries - including logistics - in a targeted and efficient manner. In addition to our core expertise in the automotive and mechanical engineering industries, we have specialized in the logistics sector, combining our many years of experience in engineering with a sound understanding of the industry to provide targeted support to medical technology companies in their search for personnel.

Regulatory requirements, digitalization and global markets are rapidly changing the framework conditions in medical technology.

In order to remain competitive, it is important to have specialists who combine technical understanding with regulatory expertise.

We support medical technology companies in filling key technical, regulatory and project-related positions and actively contribute to ensuring their development capability and delivery performance.

In this area, we are primarily able to fill the following positions:

- Development engineers (m/f/d)
- Validation & test engineers (m/f/d)
- Quality managers (QMB/QA/QM) (m/f/d)
- Technical project managers (m/f/d)
- Medical technicians (m/f/d)
- Documentation & technical writing specialists (m/f/d)
- Software developers for medical devices (m/f/d)
- Clinical affairs managers (m/f/d)
- Technical assistants & laboratory staff (m/f/d)

Advantages for your company:

- Reduction of vacancies by quickly filling vacant positions
- Relief for your HR department through targeted pre-selection
- Access to a broad network of experienced specialists
- Support with the digitalization of your logistics processes
- Flexible solutions for seasonal fluctuations or project peaks
