RLE ENGINEERING & SERVICES

Strong teams for strong partners.

With us you will find suitable specialists for shipbuilding

For almost 40 years, RLE Engineering & Services has been offering comprehensive recruitment and personnel placement services and placing highly qualified specialists with renowned employers.

We are part of the globally active RLE INTERNATIONAL Group - a leading development and consulting service provider for the mobility industry with locations in Europe, North America and Asia. We apply our many years of expertise in engineering recruitment specifically to maritime projects and have a deep understanding of the requirements of civil and military shipbuilding.

We support shipyards, system suppliers and engineering service providers in filling key technical positions and actively contribute to the implementation of demanding construction and retrofit projects.

In this area, we are primarily able to fill the following positions:

- Shipbuilding engineers (m/f/d)
- Design engineers in the field of steel construction & pipeline construction (m/f/d)
- Project managers/ technical project managers (m/f/d) shipbuilding
- System engineers (e.g. HVAC, electrics, fluid technology) (m/f/d)
- Engineers/ technicians (m/f/d) supply technology
- Testing and quality assurance engineers
- Electrical engineers/ specialists for on-board electrical systems & automation (m/f/d)
- Specialists (m/f/d) for regulations, documentation & approvals (e.g. DNV, BV, MIL)

Advantages for your company:

- Access to specialists with experience in shipyard environments, classification & regulations
- Tailor-made staffing of technical roles from design to equipment
- Relief for your HR department in the event of short-term and project-related requirements
- Support with fluctuating order situations & complex project structures
- Selection processes with a focus on technical suitability & maritime requirements
